

Job Posting: User Experience Researcher (1 Full-Time Position in Massachusetts or DC Metro Area)

This Is Us

CommunicateHealth is a mission-based consulting company that helps public and private sector organizations simplify health information. We design healthcare services, personal health tools, public health and emergency communications, and innovative interactive media. We employ a talented team of plain language writers, designers, developers, and usability specialists dedicated to creating health information and services that are attractive and easy to use. We're committed to making a difference in the world and in the lives of our employees. Check us out at www.communicatehealth.com.

This Is You

We are looking for a user experience geek with a strong interest in health communication and designing for behavior change. You have conducted in-person and remote usability studies with diverse audiences. You are an experienced moderator that is passionate about the user-centered design process. You are able to evaluate a variety of products — from full websites to web widgets to mobile apps. You excel at translating usability research findings into meaningful content strategy and product development. You enjoy working independently and collaboratively, have experience giving and receiving feedback on content, and have outstanding organization skills and attention to detail. You are passionate about making health information easier to understand and use.

Responsibilities

- Support public health and healthcare organizations in developing easy-to-use digital products
- Keep project teams and clients focused by advocating for users and their goals
- Define product requirements and specifications and adjust as necessary based on client feedback and user research findings and recommendations
- Develop research protocols including screeners and moderator's guides
- Coordinate testing logistics, particularly for remote and field-testing activities
- Conduct usability research with consumers and professionals, including usability testing, card sorting, prototype testing, etc.
- Integrate user research findings into product development
 - Work with staff to communicate findings and recommendations to internal team (writers, designers, and developers) and to the client
 - Write clear, concise reports (from top-level summaries to detailed technical reports) for delivery to clients

- Work with designers and writers on information architecture, user interaction, and content strategy recommendations
- Oversee and inform post-production quality control (QC) processes

Required Qualifications

- Master's degree in a related field such as communication or human-computer interaction, information design, or other related social science
- Minimum 5 years professional experience
- Experience conducting usability research with diverse audiences
- Demonstrated effectiveness in a project management role, with an ability to establish and document processes
- Experience providing high level editing and writing with limited supervision
- Experience working with graphic designers and web developers

Preferred Qualifications

- Experience evaluating content and tools in the healthcare or public health sector
- Familiar with federal plain language guidelines and best practices
- Familiar with IRB, Office of Management and Budget Paperwork Reduction Act, and nuances of research clearance processes
- Experience translating technical/medical information into plain language
- Experience developing products for audiences with limited (health) literacy skills
- Supervisory experience

Please send cover letter and resume to admin@communicatehealth.com by October 16, 2015.

This is for a full-time salaried position. We offer highly competitive salaries and full benefits.

CommunicateHealth is committed to workplace diversity and providing equal employment opportunities for all qualified applicants and employees.

As federal contractors, we are required to ask applicants to submit a voluntary Demographics form, at www.communicatehealth.com/company/contact/. No personnel selections are made based on this information.
